

Industry: Law Firms & Legal Services

Over 25,000 Additional Sessions!

This Law Firm & Legal Services client began working with SocialSEO in 2018. They offer their services in a metropolitan area that is a historically difficult market for that industry. We went through practice area pages, increasing the content count from around 600 words to 1500 – 2000 words per page to compete in that market effectively. On top of that, we also created and published 4 blog posts per month. In 2021, they are now ranking #1 for “(location) car accident attorneys,” their primary service offering, due to increasing the content word count and SEO for the pages.
